KALADEVI RISHIDEV

Frontend Developer | React & Next.js Specialist

Kathmandu, Nepal • +977 9847714152 • kalpanabhandari383@gmail.com • github.com/kalpana-4321 • LinkedIn

PROFESSIONAL SUMMARY

Detail-oriented and results-driven **Frontend Developer** with a B.Sc. in Computer Science and Information Technology (B.Sc. CSIT) and practical experience building scalable, responsive, and performance-optimized web applications. Proficient in **React.js (18/19), Next.js 16 (App Router), TypeScript, JavaScript (ES6+), and Tailwind CSS**. Experienced in frontend state management, REST API integration, and modern performance optimization techniques (achieving 98+ Google Lighthouse scores). Demonstrated capability in connecting frontend interfaces with serverless databases (Neon PostgreSQL), AI agents (Google Gemini), and payment gateways (Khalti). Holds a strong foundation in networking, IT systems, and technical troubleshooting from an internship at Nepal Rastra Bank.

TECHNICAL SKILLS

Frontend Technologies: React.js, Next.js 16 (App Router), JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS (v3/v4), Vite, Single Page Applications (SPA), Responsive Web Design (RWD)

State Management & Routing: React Context API, React Router (v6/v7), Custom React Hooks, Framer Motion

Backend & Cloud Services: RESTful APIs, Serverless Functions, Neon Serverless PostgreSQL, Google Gemini API (@google/genai), Khalti Payment Gateway Integration, Zod Validation

Performance & Web Vitals: Code Splitting (React.lazy, Suspense), Image Lazy Loading, Vite manualChunks Bundling, Service Workers (Offline Caching / PWA), Core Web Vitals (LCP, INP, CLS), Google Lighthouse Optimization

Developer Tools & Methodologies: Git, GitHub, Postman, Vercel, Netlify, VS Code, npm / pnpm, Chrome DevTools, Agile/Scrum

Networking & Systems: Cisco Packet Tracer, Subnetting, TCP/IP, Routing & Switching, VLANs, Hardware & Printer Troubleshooting

WORK EXPERIENCE

Frontend Developer Intern / Trainee — *Codveda* Aug 2026 – Sep 2026 | Remote

- Built modular, reusable Single Page Applications (SPAs) utilizing **React 19**, **Vite**, and **React Router v7** with zero full-page reloads and animated route transitions via Framer Motion.
- Engineered **OptiPulse**, a web performance application featuring asset minification, vendor chunk splitting, image lazy loading, and Service Worker caching, achieving a **98–100 Google Lighthouse score** across all audits.
- Developed **GitPulse**, a search platform consuming the GitHub REST API with custom debounce hooks (`useDebounce`) to reduce redundant API calls by 450ms, integrating skeleton shimmer UI loaders.
- Managed global application state using the React Context API with persistent local storage synchronization for user preferences, real-time message feeds, and dark/light mode themes.

IT & Networking Intern — *Nepal Rastra Bank (NRB)* May 2026 – Jul 2026 | Baluwatar, Kathmandu

- Diagnosed and resolved IP address conflicts, hardware faults, and network connectivity issues across internal banking departments to maintain continuous operational uptime.
- Configured, tested, and troubleshot network printers and workstations, handling static IP allocations and secure network access.
- Simulated and analyzed enterprise LAN/WAN network topologies using **Cisco Packet Tracer**, configuring switches, routers, VLANs, and subnets in accordance with security protocols.
- Documented network troubleshooting workflows and supported senior engineers in daily IT infrastructure maintenance.

FEATURED PROJECTS

Expense & Financial Tracker (Full-Stack Next.js with AI & Khalti) github.com/kalpana-4321/Expense-tracer

Next.js 16, React 19, TypeScript, Tailwind CSS v4, Neon PostgreSQL, Google Gemini API, Khalti API, Zod

- Built a modern personal finance tracking application featuring income/expense analytics, category budgets, and savings goal trackers.
- Integrated an intelligent **Financial AI Agent** powered by Google Gemini (`@google/genai`) to provide real-time conversational budget recommendations and spending audits.
- Implemented **Khalti Payment Gateway** integration supporting secure checkout initiation, transaction status lookup, and callback verification.
- Connected a serverless **Neon PostgreSQL** database with server-side queries and enforced end-to-end data validation using Zod.

OptiPulse — Web Performance Showcase github.com/kalpana-4321/codveda-performance-app

React 19, Vite, Service Workers, Web Vitals API, Framer Motion, CSS Variables

- Designed an interactive benchmarking application demonstrating modern frontend optimization techniques, maintaining a **98–100 Lighthouse score**.
- Integrated real-time Core Web Vitals monitoring (LCP, FCP, TTFB, INP, CLS) utilizing the official `web-vitals` browser package.
- Implemented Service Worker offline caching (Stale-While-Revalidate) and Vite code-splitting to minimize bundle size and initial load latency.

Recipe Finder & Weekly Meal Planner github.com/kalpana-4321/Recipe

React.js, React Router, TheMealDB REST API, LocalStorage, CSS3

- Developed a dynamic recipe search engine and weekly meal planning web app consuming TheMealDB REST API.
- Implemented client-side state persistence using the browser `localStorage` API for zero-latency data consistency across browser sessions.
- Designed reusable UI components including interactive meal-scheduling modals, contextual search filters, and asynchronous detail views.

Shopper — E-Commerce Storefront github.com/kalpana-4321/shopper-frontend

React.js, JavaScript (ES6+), Semantic HTML5, CSS3, REST APIs

- Developed a responsive multi-category e-commerce storefront with customized product catalogs for men, women, and kids.
- Built client-side filtering algorithms to dynamically sort products by category and pricing without triggering page reloads.
- Integrated REST API endpoints for user authentication, signup validation, and protected route access.

YouTube Clone (StreamPlay) github.com/kalpana-4321/-yt-clone

React.js, Tailwind CSS, RapidAPI / YouTube v3 API, React Router

- Created a responsive video streaming platform featuring asynchronous video search, real-time playback, and channel metadata rendering.
- Implemented responsive grid layouts with Tailwind CSS, ensuring smooth rendering across desktop, tablet, and mobile viewports.

EDUCATION

Bachelor of Science in Computer Science and Information Technology (B.Sc. CSIT) Dhankuta / Kathmandu, Nepal

Tribhuvan University (TU)

Higher Secondary Education (+2 Science / Computer Science) Dhankuta, Nepal

Shree Triveni Higher Secondary School

LANGUAGES

English: Professional Working Proficiency | **Nepali:** Native / Bilingual Proficiency
